

Senior Product Designer with 5 years driving end-to-end UX Research, User Discovery, and Product Design for complex enterprise ecosystems. Operating as an embedded solo designer, I partner with Product Management to align user needs with Business KPIs and Technical Feasibility. Leveraging AI-Forward Processes (Figma MCP, Claude Code) and front-end expertise, I architect scalable Design Systems and manage Figma Administration to flawlessly bridge design intent with engineering execution.

PROFESSIONAL EXPERIENCE

Deposco | Product Designer | Alpharetta, GA Dec 2023 - Present

Operating as the primary Product Designer embedded directly within the Product Management team, balancing user needs with core business goals for complex supply chain software.

- **Design Systems & Governance:** Architected and currently manage a highly scalable, tokenized Design System from scratch. Act as the lead for Figma Administration, ensuring strict component governance and seamless front-end developer handoff.
- **AI-Accelerated Prototyping:** Pioneered AI-Forward Processes by integrating Figma MCP and Claude Code into the daily workflow, rapidly building interactive prototypes that drastically reduce the discovery-to-delivery cycle.
- **Product Management Alignment:** Lead cross-functional Design Workshop Facilitation and User Discovery sessions, translating complex business requirements into modern, accessible Enterprise Workflows.
- **UX Research & Validation:** Design and execute continuous Usability Testing protocols; synthesize qualitative user research to iteratively validate solutions that empower diverse personas.
- **Technical Handoff:** Leverage deep front-end coding literacy to collaborate directly with engineering teams, ensuring strict Technical Feasibility and zero-defect implementation.

Deposco | UI Designer | Alpharetta, GA Sep 2021 - Dec 2023

Managed UX and UI design architecture across eight distinct product offerings, establishing foundational consistency.

- **Information Architecture:** Executed end-to-end UX Research to map out and streamline complex user journeys, establishing robust frameworks and Information Architecture across the suite.
- **Iterative Design:** Delivered robust wireframes and High-Fidelity Prototyping, grounding all interface decisions in user-centered Product Thinking methodologies.
- **Cross-Functional Collaboration:** Partnered closely with cross-functional development teams to establish seamless handoff processes, elevating overall usability and design consistency across all 8 products.

Kennesaw State University | UX Coordinator & Digital Communication Specialist | Kennesaw, GA May 2019 - Oct 2021

- Spearheaded print and digital visual design for a high volume of academic programs, workshops, and international conferences (up to 500 attendees), ensuring brand consistency across all touchpoints.
- Collaborated with a cross-functional operations team to execute seamless, user-centric experiences across dozens of complex virtual and in-person events.
- Designed and configured interactive event applications (via Sched.com), bridging physical event logistics with a cohesive digital presence for attendees.

EDUCATION

Kennesaw State University | Kennesaw, GA Aug 2016 - May 2021

Bachelor of Science in Interactive Design / User Experience Design

CORE COMPETENCIES & TECHNOLOGY

- **Product Design & UX:** UX Research, User Discovery, Information Architecture, Usability Testing, Design Workshop Facilitation, Enterprise Workflows, Product Thinking, Wireframing.
- **AI & Technical Workflow:** AI-Forward Processes, Figma MCP, Claude Code, AI-Accelerated Prototyping, Front-End Architecture, Technical Feasibility.
- **Design Ops & Systems:** Design Systems Architecture from Scratch, Figma Administration, Tokenized Component Libraries, Design Governance.
- **Tools & Languages:** Figma, Claude/AI, Webflow, React, Next.js, HTML, CSS, JavaScript, TailwindCSS, Adobe Creative Cloud.
